Subject: Re: Your thoughts in conference symposium proposal for indoor air grants

Makes sense to me. I don't know what if any censorship will be place. I would title it in quotes as Summary and Synthesis of EPA RFP Grants "Climate and Indoor Air" ...or whtevr the original name is.

Subject: Your thoughts in conference symposium proposal for indoor air grants

Hi Dan,

Vito has suggested that we organize a symposium including the Indoor Air and Climate Change grantees at the upcoming Indoor Air 2018 conference – rather than having our typical final progress review meeting with the grantees. This would occur next summer July in Philadelphia (a few more details below).

Many of the grantees and the EPA indoor air people already typically attend this conference so it would be a good venue and I don't think are regular OAQPS crowd will be as interested in results from these projects. Overall, I like this idea.

Jim Johnson would like to know whether you are supportive before giving approval for Vito to propose a session. Deadline is 11/15/17.

Let me know. If you have questions, we can chat.

Subject: FYI: conference symposium proposal

Dr. Johnson,

I have been thinking about submitting a workshop or symposium session proposal for the Indoor Air conference in Philadelphia next summer, along with a colleague from the California Dept. of Public Health. He leads the Climate Change and Indoor Air workgroup for the society organizing the conference, and as you might expect, that is also the topic of the planned workshop. While the agenda is still fluid, I expect that at least some of our grantees will be invited as presenters. It might even be possible to hold our final progress review there, though that may be a problematic scenario.

Discussing the topic with Kelly for any sensitivities, it seemed best to give you advanced notice at this early stage, in case you have any specific guidance for us to keep in mind.

Thank you

Vito
